

## Introduction

**Connotation Technologies** is a progressive consulting company focused on bridging the gap between optimal business needs and efficient technology solution for its clients. In our business model Success is defined as delivering correct, cost effective and timely solution to our clients. We provide full spectrum of information technology services required by the nation's leading corporations. We are capable of responding quickly and effectively to the requirements and professional service needs of large and small corporations. We continuously keep ourselves abreast of the latest tools, technologies and methodologies to support our consulting services.

We always maintain a pool of competent consultants through a structured program of recruitment, in-house training, technical support and constant monitoring. We pay particular attention to acquiring, upgrading and maintaining skills in emerging technologies. We welcome the challenge to find the technical professional with the exact experience to match our client needs. We provide a tailored response to each requirement of our clients.

## Our Motto

**Quality Service:** In order to serve our clients effectively, we offer a comprehensive set of services that encompass full range of today's information technology tools, methodologies, and capabilities. We offer these services to work in partnership with our clients to achieve their goals and accomplish objectives, in a timely fashion, while providing optimum return on your investment.

**Client Satisfaction:** Working closely with our clients either on-site or at our development facility, we have successfully built, shipped and implemented optimal solutions without exceeding budgeted time and material and keeping customer satisfaction and highest quality of work as our goal.

## Our Services

In the past years, **Connotation Technologies** has been providing its clients with various solutions to cater to their IT needs ranging from custom application development to IT consultancy. The services are as follows

- Custom Application Development
- IT Consultancy
- Ready Made Product Implementation
- Manpower Outsourcing
- On Line Retail Store
- IT Infrastructure Support

### Our Services in Detail

#### Custom Application Development

Often Due to business needs, it is not found to be feasible to go for an enterprise level ready-made solution. In such cases we cater to the needs by developing a solution tailored to cater to such needs.

#### IT Consultancy

Connotation strikes the right chord, as always, when it comes to providing IT consultancy to our esteemed clients for their IT needs. This not only includes core IT consultancy, but also includes corporate training in different IT fields.

#### Manpower Outsourcing

We maintain a large pool of personnel having the right kind of IT knowledge to cater our clients' needs of manpower support.

### **Ready Made Product Implementation**

We have a fairly large range of products to choose from, pertaining to varied domains of requirement. Clients are provided with an off the shelf product, depending on their requirements, with options for customization.

### **On Line Retail Store**

We are about to launch a online shopping cart portal named [www.valuadds.com](http://www.valuadds.com)

### **IT Infrastructure Support**

Connotation Technologies is well equipped to provide its clients with IT infrastructure support through its pool of highly skilled manpower.
